

OPU PAL

Full Stack Software Engineer

Jamalpur, Bangladesh | +880 1920172104 | opupal07@gmail.com | linkedin.com/in/opupal | github.com/opurbo007 | opurbo.vercel.app

SUMMARY

Full Stack Developer with 2+ years of experience building scalable, offline-first web and desktop applications using Next.js, React, Node.js, Express, and Electron — now also leading delivery and technical decision-making for a 5-person development team on client projects. Solved cross-database compatibility challenges (SQLite/PostgreSQL) in production, with hands-on experience across SQL/NoSQL databases, WebSocket, Docker, and CI/CD. Actively building hands-on experience with LLMs, including fine-tuning.

SKILLS

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, HTML, CSS, JavaScript, TypeScript

Backend: Node.js, Express.js, Next.js API Routes, Next.js Server Actions, NestJS

Databases: MongoDB, MySQL, PostgreSQL, SQLite, Redis

Tools & Practices: Electron, WebSocket, NextAuth, Prisma, REST APIs, CI/CD, Docker, Offline-first & multi-tenant app design

EXPERIENCE

Project Manager

Oct 2025 – Present

Techy's IT — Nottingham, UK (Remote)

- Lead delivery of client projects for a 5-person development team, coordinating scope, timelines, and technical trade-offs between clients and engineering.
- Introduced and enforced sprint planning and code-review standards, improving delivery consistency across the team.
- Remain hands-on with the codebase, bridging management and engineering on complex technical decisions.

Full Stack Developer

May 2024 – Oct 2025

Techy's IT — Nottingham, UK (Remote)

- Built scalable web and desktop applications using Next.js, React, Node.js, and Electron across multiple products.
- Resolved a core SQLite/PostgreSQL compatibility gap — SQLite doesn't support array types — by designing an alternate data-modeling approach that kept both databases reliably in sync.
- Ran database synchronization in the background so store staff experienced no interruption to their workflow, even with intermittent connectivity.
- Developed secure authentication with NextAuth and custom role-based access control.
- Managed databases with Prisma ORM for type-safe queries and schema migrations.

KEY PROJECTS

Restaurant Management System

- Built a full restaurant management system covering a customer-facing website, a tablet-based ordering app for waiters, and an offline-first POS.
- Designed the order, billing, tables, and inventory UI, scaled across 3 branches with secure remote backups.

Techy's IT — Retail & POS Platform - mytechys.co.uk

- Built Techy's IT's own combined IT-and-retail company site, plus a separate in-house POS system used across its 2 retail shops.

Food Delivery Platform

- Built a full-stack food delivery platform (100+ users, 70+ partner restaurants) using the MERN stack, Next.js, and NestJS — live across multiple UK cities including Nottingham and Manchester.
- Used Redis to maintain live driver location and WebSocket to power a real-time admin dashboard, including live driver tracking and delivery-location verification.
- Built order lifecycle management with live status sync and role-based authentication using NextAuth/JWT.

Car Repair Platform - wheelline.co.uk

- Built a full-stack platform for a car-repair business using Next.js, Node.js, and PostgreSQL.
- Public site for customers to submit repair orders, plus a role-based admin panel to manage orders and day-to-day operations.

EDUCATION

B.Sc. in Computer Science & Engineering — Dhaka International University 2019 – 2023

ACHIEVEMENTS

ICPC 2020 Participant · Winner, Programming Contest — SIU Tech Fest 2021 · Winner, Hackathon Contest — SIU Tech Fest 2021 · Runner-up, Project Showcase — SIU Tech Fest 2021
